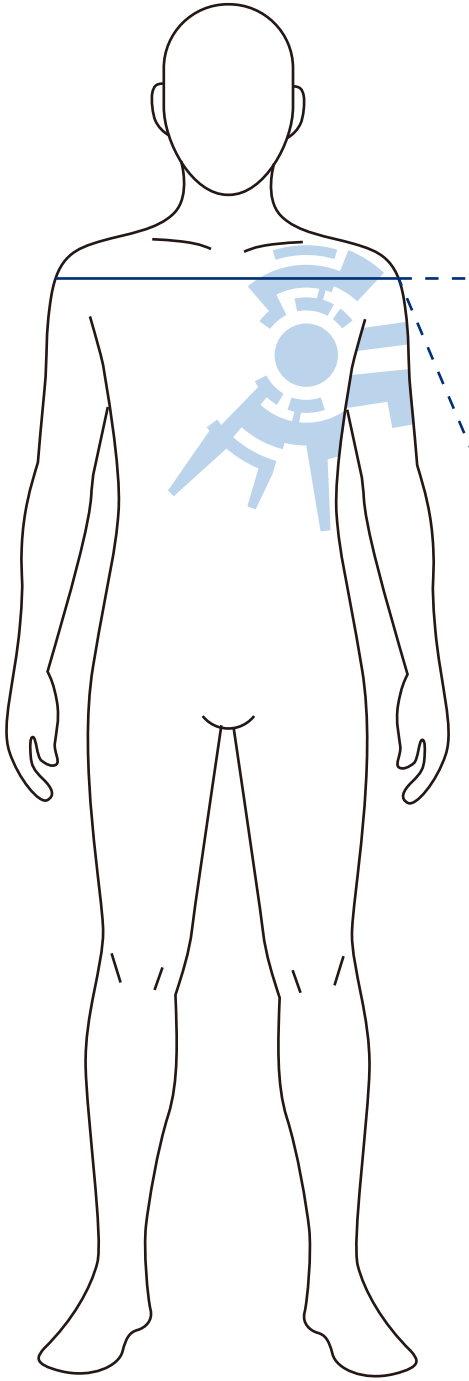
C8 Crotch to floor
C10 Shoe size
if using US sizes
please specify
whether it's Men's or Women's sizing



C11 Shoulder width

Please measure your shoulder width as follows:
Stand with your back against a wall,
and make a mark on both the left and right
sides of your shoulders.
Then, measure the distance between the two marks
to get your shoulder width.

If you can find an L-shaped corner,
you can also place one shoulder against one wall
and make a mark at the other shoulder.
Then, measure the distance from the mark
to the wall to determine your shoulder width.

C12 Shoulder circumference

Body Measurement Guide

**By default, we will add 5 cm (≈2 inches)
to bust, waist, hips, and upper arm circumference
to allow for measurement error.
All other dimensions will be made
exactly as provided.**

**If you have any questions during the measurement process
feel free to contact Lee – I'll be happy to help.**
